<b>Theme</b>	Hunger (Own theme)

## **One line pitch of your idea**

Combining city data with a list of specific needs from food pantries will allow citizens to most effectively make useful and needed donations assisted by the Pantry Pick Up App.

## **Problems, you are solving**

- Starvation of kids
- Wastage of food
- Quality of mid-day meal

## **Description of Solution/Product provided**

With this website, we will save the unused food of large pantries of the city that could be of college, school or office and provide the same food to the slums or provide that food as mid-day meal.

## **Competitors (Put it simply using SWOT Analysis)**

- Strengths- Usage of unused food and feeding of slum people
- Weaknesses- Irregular distribution of food
- Opportunities- Employment of delivery people
- Threats- No threats

## **What innovation are you bringing?**

The innovation in this project would be that we would map the city in circles and in each circle there will exist a pantry which will take care of food needs of people living in that circle.
